SHAWN@SHAWNABURGESS.COM

SUMMARY:

- Proficient with C#, Java, PHP, Python, SQL and related technologies.
- Web application software development experience.
- Experience leading a development team.

EMPLOYMENT:

Sr. Software Developer

January 2017 to June 2025

Arxspan / Bruker, Southborough and Billerica, Massachusetts

- Design and code new applications and components as leading role in a small team using C#, React, and SQL.
- Maintain and modify existing applications written in Classic ASP, JavaScript, Python, and PHP.
- Collaborate cross-functionally with other engineers, project managers, business users, and customers to achieve elegant solutions.

Sr. Application Developer

February 2013 to present

The Hanover Insurance Company, Worcester, Massachusetts

- Write software applications as part of a large team for the AgencyPort platform. Using Java, the AP XML framework, SQL, and AngularJS.
- Develop JavaEE web applications and RESTful web services using Spring, Hibernate, and Maven.
- Key member of the Hanover DevOps group that evaluates new development tools.
- Helped lead transition to GIT.

Sr. Technical Analyst

November 2008 to February 2013

EBSCO Publishing, Ipswich, Massachusetts

- Developed major applications to manage internal workflows as leader of a two person team using Spring MVC, Hibernate, JUnit, JSP, Bootstrap, JQuery and HTML5.
- Developed web application to facilitate outside content review using PHP, MySQL, and JavaScript.
- Wrote many smaller applications, software extensions, maintained legacy applications, managed application servers and wrote reports using appropriate technologies.
- Took the lead where discussions involve consensus.

Software Developer

March 2006 to September 2008

Compex Integrated Systems, Worcester, Massachusetts

- Developed and tested database software for a manufacturing environment.
- Worked with clients to deliver custom software to their specifications.

EDUCATION:

Bachelor of Science - Computer Science
